Home Page

Elcor Construction is the industry leader for road construction in Southern Minnesota. We specialize in all areas of road construction, including excavation, grading, utilities, and paving.

We have earned a reputation for high quality work and customer satisfaction. This is because we are dedicated to maintaining the highest standards of quality, safety, and reliability for our customers and employees.

Whether the project is a shopping center parking lot or a residential asphalt driveway, Elcor Construction is dedicated to building strong and dependable infrastructure for public and private customers.

Our company is on the forefront of technology. Elcor Construction provides innovative solutions to the most complex roadway projects by performing all excavation and grading work as well as installation of underground utilities. Elcor maintains tight control of every job site to provide you with the highest quality.

Notable Projects

Elcor Construction is at the forefront of construction in Rochester, MN. Two of our notable projects are:

- The Downtown Second Street Construction Project in Rochester
- Hundred-Acre Northwest Kwik Trip Commercial Center

About Us

Since 1986, Elcor Construction has provided innovative solutions for the most complex projects. Our professional and capable staff brings a wide range of skills to each project.

We are a heavy equipment construction company that performs excavating, grading, and installation of water and sewer pipe. We can do every phase of road construction including excavation, underground utilities, paving, paving maintenance, and trucking.

We create satisfaction through building strong relationships with our customers by emphasizing the common goals of quality, safety, and teamwork.

We have the equipment and skills to provide full services for commercial, industrial, and residential customers. Our services cover every aspect of road construction.

Excavation

Excavation is the part of a construction project in which heavy equipment is used remove and level earth. This allows roads, homes, parking lots, and commercial buildings to be built.

However, excavation consists of much more than moving dirt with a bulldozer. An excavation job must be properly surveyed, planned, and executed in order to meet the job specifications and comply with local ordinances. Our project managers will ensure that every job is professionally planned and executed.

Elcor Construction has the equipment and the expertise to do your job professionally and in a timely manner. Our large fleet of bulldozers are GPS-equipped, making them much more efficient.

With our fleet of heavy equipment, we can move a lot of dirt. In other words, we can take on any size excavation jobs. Whether it's excavation of a subdivision, commercial lot, or pond, Elcor Construction is the team to call.

Grading

Proper grading prevents corrosion, poor draining, and potholes. Setting a grade correctly the first time is essential because correcting grading mistakes is costly and time consuming.

At Elcor Construction, our highly skilled professionals utilize state-of-the-art equipment to grade the land surface to ensure correct draining, control erosion, and keep the surface easy to maintain.

There is no need to contact a separate grading contractor. Elcor Construction has the expertise, equipment, and experience to do the job right.

Utilities

Elcor Construction provides a single solution for underground utility installation and reconstruction. We provide open field pipe installation to complex urban reconstruction projects. Our underground utility services include installation and reconstruction of sanitary sewers, storm sewers, and water mains.

It is essential to have the right contractor install underground utilities correctly. Elcor Construction has the know-how and tools for both reconstruction and installation of sanitary sewers, storm sewers, and water mains—from digging and grading the trenches to laying the pipe.

We have the equipment and skills to provide full services for underground utility installation and reconstruction. Elcor Construction provides innovative solutions to the most complex underground utility project.

Trucking

Elcor Construction has a fleet of tri-axle and quad-axle dump trucks available for hourly rental. We also have lowboys and belly dumps available.

Tri-Axle and Quad-Axle Dump Trucks

If you need to haul tons of material, rent one of our dump trucks. We have tri-axle and quad-axle dump trucks, so we have the right dump truck for your job size.

Lowboys

A lowboy is a trailer with a drop in deck height. Because the deck is low compared to other trailers, lowboys are used to haul heavy equipment, such as bulldozers.

Belly Dumps

A belly dump (or bottom dump) is a trailer with a dump gate in the belly of the trailer. A belly dump is used often used for laying gravel.

Professional Drivers

With all our trucks rentals, we provide a professional driver. All you have to do is reserve the truck. Our professional drivers know how to haul large loads safely and efficiently. So, the next time you need a truck, call Elcor Construction.

Safety

At Elcor Construction, we highly value the safety of our employees and customers. We understand that there is nothing more important the health and safety of a human life. We place safety first.

Because we are a large equipment company, we understand that accidents can happen. So, we have on staff a full-time safety coordinator. Our safety coordinator has a weekly safety meeting with all of our teams.

During these meetings, we provide instructions to remain safe at our job sites. We review any incidents that might have occurred, and take actions to prevent them from repeating.

Elcor Construction has the highest dedication to observe all federal, state, and local safety regulations. We take our responsibility to keep people safe seriously.
